

TEAM (Teaching Effectiveness and Motivation)

A teacher's job is a tough one. Teaching is an art and it requires special skills to be a true teacher. TEAM takes teachers through aspects which will make them feel proud of their profession and realize their true worth. The module will cover qualities of a true teacher, their challenges in the modern academic scenario and motivating themselves and students.

SHAPE (Simple Household Actions for Parenting Effectiveness)

Parenting is a blessing. It is all about raising and educating children. Simple as it may sound, the demands of true parenting are challenging. Our SHAPE programme explains the various types of parenting and also gives parents simple, basic meaningful insights about this concept.

EASY (Enhancing Academic Skills Yourself)

Frequent instructions to study can be annoying for students. They should understand that education is something that has not been thrust upon them and

should realize the value of it themselves, depending on age. The EASY module gives students interesting information and tips to improve their academic skills and helps them learn and improve themselves in a systematic manner. The module also details how learning can be made enjoyable.

CLINICAL SERVICES. They form the base of our programmes and provide the much required remediation through a team of passionate professionals for all problems in psychology, speech & audiology and nutrition.

RACE (Right Accent for Communication Effectiveness)

This is a unique module that stresses upon Accent Reduction and Neutralization by reducing Mother Tongue Influence (MTI) and Intonation (Speech Music) enabling people to be better communicators in English. This module also covers aspects like Grooming, Telephone etiquette, Interview Skills, Public Speaking and Body Language.

REMEDIAL TRAINING

Not all students are alike. Capabilities and skill sets vary. The various areas in which they need improvement are technically analysed and the students are put through customised programmes to become more responsible, matured and confident individuals.

A 'change for the better' is an aspect of focus at The Compass Team. Our efforts are always on to provide better solutions by offering new programmes that will foster a positive change in students, teachers and parents. We work on tailor made programmes for specific purposes because we understand that each school has a special requirement.

Come, be our partners for the change.

HOPE IS ALL IT NEEDS **THE REST IS ASSURED**

Exceptional programmes for remedial training

GEARING UP GROWTH

The Compass Team
Advantagee

The Compass Team is the outcome of the never ending efforts of a group of professionals to enrich student lives to make them socially committed and responsible individuals, to develop mould and nurture them into self confident personalities.

Our programmes not only focus on holistic development of students, but also identify and provide remediation for the ones who need that extra care. Our areas of expertise span through Psychology, Speech, Audiology, Nutrition, Behavioural and Life Skill Training to Effective Parenting and Faculty development.

We believe that every link in a chain is important and have designed our programmes on a 360 degree platform. The Variety and depth of our programmes are ample proof of the fact that we care at every stage. Built on sound fundamentals, they are made to make learning, teaching and parenting a pleasure.

Our clinical services, delivered with the warmth and maturity of experienced professionals who are passionate about children, will complement our tag as 'an end to end solution provider'. We are committed to value addition that we have included Students' Safety Insurance and Group Messaging to the bouquet of services.

We invite you to experience the 'change'

HOPES

(Holistic Programme for Evaluation of Students) is a unique programme that adopts a multi pronged screening approach in scientifically evaluating students on various parameters that have a bearing on their holistic development. With an increasing percentage of students facing segmental imbalances in the areas of psychology, speech, audiology and nutrition, a solution that provides screening, assessment and remediation under one roof is imperative. The western world is well ahead of times, that it is mandatory for schools to have similar programmes in the curriculum. The HOPES programme gives a ray of hope with the involvement of the following specialists.

1. Doctor/Pediatrician
2. Dentist
3. Ophthalmologist/Optomtrist
4. Speech Language Pathologist
5. Audiologist
6. Psychologist
7. Nutritionist

The Programme, which has a medical checkup involving specialists as mentioned above, also has a unique method of evaluation by the specialists for

1. Speech, language and communication skills,
2. Hearing test for measuring hearing sensitivity
3. A detailed psychological evaluation that includes
 - a. IQ Assessment
 - b. Life Skills Assessment comprising of
 - i. Social,
 - ii. Emotional
 - iii. Thinking skills
 - c. Academic skills assessment.
 - d. Gross and Fine motor skills assessment
 - e. Learning Disability Assessment
 - f. ADHD
4. Nutritional evaluation that takes into account food habits including
 - a. Diet recommendation for obesity and underweight
 - b. Examination Diet

Unique features

1. Multi faceted approach which combines the skill sets of 7 different specialists, which will ensure that both physical and cognitive screenings are addressed.
2. Evaluation, assessment and remediation under one roof
3. A unique report distribution system where parents of children identified with problems can have personal counseling sessions with specialists.
4. Maintaining service level with a follow up after 6 months wherein progress of students identified with problems is re assessed and comparison made between the two stages-pre and post screening.
5. CLASS included in the module.

CLASS (Comprehensive Life skills Assessment)

This programme is a part of the Continuous and Comprehensive Evaluation (CCE) as laid out by CBSE. It includes :

1. A detailed medical evaluation comprising of a team of a doctor, dentist and an ophthalmologist
2. An assessment of co scholastic skills comprising of
 - a)
 - Social Skills (communication and inter personal skills)
 - Emotional Skills (dealing with emotions, stress and self awareness)
 - Thinking Skills (creative and critical thinking, problem solving and decision making)
 - b)
 - i) Attitudes
